Mr. Oladepo Oyinsa
Michigan Department
Environmental Response
505 W. Main Street
Northville, Michigan

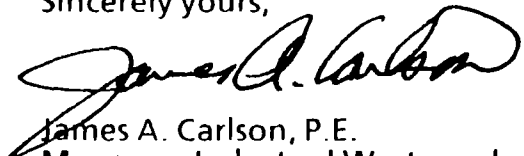

Dear Mr. Oyinsan:

We are forwarding to you, with this letter, a copy of the Interim Report on the Underground Storage Tank Closure Project at the Acustar Trenton Chemical Plant in Trenton, Michigan. The report addresses the remedial and closure work completed at the site to date. Included are the analytical results for soil samples taken for waste characterization purposes in the area adjacent to the tanks.

Our consultant, Hart Environmental Management Corporation, is preparing a work plan to further assess the subsurface soil and groundwater conditions in this area. The assessment will focus on xylene and petroleum hydrocarbons which were detected in the waste characterization soil samples. The information and data generated by this assessment are essential for the development of a cost effective remedial action strategy for this project.

We will continue to keep you informed as we progress on this matter. If you have any questions, please contact me at (313)956-0884.

Sincerely yours,

James A. Carlson, P.E.
Manager, Industrial Waste and
Hazardous Substance Compliance
